## Outstanding Contribution to Energy Decarbonisation Award 2026

Cutting the carbon emissions from the production of energy is vital to meeting the UK's climate goals and supporting energy security. This award recognises the contribution a company has either already made to reduce such emissions or the potential solutions it offers to make fresh progress in the years to come.

It can be technology driven, reflect process optimization or wider drivers. The ethos and approach of the company, regardless of its size, should reflect the power of collaboration with the wider supply chain and adhering to the OEUK Supply Chain Principles.
